

Mid-Senior Full Stack Web Developer @ Software Startup

We're excited about the new opening for a Full Stack Developer to join our awesome team. If you believe in loving your neighbor as yourself, being a good steward, and working together as a family in the pursuit of passion, a role at Exit Intelligence might be for you. <https://exitintelligence.com/about-us/>

Exit Intelligence is an Email & SMS Capture Agency, utilized by eCommerce companies to turn bouncing website visitors into buyers. If you're interested in e-commerce or digital marketing, this is an incredibly unique opportunity to join an accomplished team and help blaze the trail for future growth.

You will work directly with our CTO and team of developers building the next generation of ecommerce focussed marketing tools centered around customer acquisition.

WHAT YOU'LL DO

- Help design, build and deliver full stack software products for use by mid market ecommerce companies, using the latest web technologies
- Work directly with the CTO and a team of developers
- Be a critical part of building something great on a small team

REQUIREMENTS

- 2+ years of professional experience in a programming environment
- Proficient in Javascript frameworks
- Proficient in HTML/CSS
- Experience with REST API patterns
- Desire to learn and grow
- Proficient English communication
- Git

NICE TO HAVE EXPERIENCE

- React
- NodeJS
- GraphQL
- Relational and/or NoSQL database (PostgreSQL, Mongo)
- Docker
- Kubernetes
- AWS
- Agile SCRUM Methodology

Compensation based on skill and experience.

TO APPLY

To apply, please **do not only send us your resume**. Please email your resume, cover letter, and why you believe you would be a good fit for our organization to vassilis@exitintel.com.
